Spring 1	Number and Place Value	Properties of Shapes
Spring 2	Four Operations	Statistics and Probability
Summer 1	Number and Place Value	Measurement – Time and Temperature
	Fractions, Ratio and Algebra (Waypoints 7-14 only)	
Summer 2	Four Operations	Position and Direction

This is an annual long-term plan, whereby every year (A, B, C and D) these topics will be the same, however, the activities and sessions can be adapted in order to be linked to the curriculum theme/topic for the term.

Core Focus refers to the area, which is regularly being developed, taught and integrated into daily routines and activities. Some sessions may be taught discreetly, e.g. addition.

Application Focus refers to the area which should be taught within My Thinking and Problem Solving sessions, using the core focus skills to develop an awareness of real life application.
